# Gutter Sentry

SKU: GS2025

## WARRANTY

Contact us for warranty details

The unique patented design of Gutter Sentry turns your average gutter into a complete box design, providing unequalled strength against bending, twisting and crushing. The Gutter Sentry allows the eavestroughs to remain firmly in place in extreme weather conditions, without sagging because of snow and ice formation. The structure is strong enough to support the weight of a ladder pressed upon it, without crushing or deforming. The Gutter Sentry perforation system, with its twenty 1/8 in. holes per square inch, provides unequalled drainage capacity, up to more than 4 times the heaviest precipitations known worldwide. Essentially, this means that even the presence of debris on the Gutter Sentry will never hinder the drainage capacity of your eavestroughs. The presence of clogged eavestroughs around your home is worse than having no eavestroughs at all.

## Key Features

- {"Protect the value of your home.", "Made from heavier gauge aluminum; there is no substitute for strength.", "The highest drainage capacity of any gutter cover on the market today, more than twice that of the competition.", "Unique patented "football" design snaps over any conventional gutter lip easily and efficiently — no crimping required.", "Full plated spacing at every 5 inches between rows of holes acts as a hanger to reinforce the strength of the cover.", "Mounting holes spaced at 2.5 inch intervals for an even and perfect installation.", "Angular surfaces allow large debris to sit higher on the cover so wind and weather push it away — minimizing maintenance."}

## Installation Guide

---

- 1 Insert the back of the Gutter Sentry on top of the back of the eavestrough.
- 2 Insert the front of the Gutter Sentry cover under the front of the eavestrough.
- 3 Note that the Gutter Sentry directly snaps over the back of the gutter; no crimping is required to maintain it in place.
- 4 All the panels of the Gutter Sentry cover overlap and connect perfectly.
- 5 Screw the Gutter Sentry and gutter.
