Mitten Highland 42 Series is one of the most versatile horizontal vinyl siding systems in the Mitten lineup, offering six distinct profiles and 17 colours in a single product family. The profiles span single-4, double-4, and dutch lap configurations — giving contractors the flexibility to match virtually any architectural brief with consistent quality and exposure height. Built at 0.042" gauge with a classic cedar-grain emboss, Highland holds its dimensional stability across the temperature extremes common on Canadian job sites.

Highland 42 carries CCMC acceptance and PEPA certification, confirming it meets the performance thresholds required for residential and light commercial exteriors across Canada. The product ships with a lifetime non-prorated transferable warranty alongside a colour fade guarantee — coverage that transfers with the home if the property changes hands, which matters for resale-oriented build projects.
